Were you planning to ask them to review any data? They would need to have an idea about levels, etc before they could talk with the community.

Jennifer:

I talked with Carrie Bradford on Friday about the site. She has a couple of people that will be down in Houston next Thursday and Friday and is going to see if they could stop by the site (4904 Griggs Road). She indicated that after they stop by and talk with me that they would see if there was anything that they could do to assist.

Generally, I was thinking that walking the neighborhood and talking with the residents about impacts on their health that may be associated with the site. Do you have any ideas?

Thanks

Gary Moore
